

Did you know that we have reusable pads and moon cups?

Bloom & Nora created reusable sanitary pads that are completely Oekotex certified which means there are absolutely no harmful chemicals in the product or next to your bits.

Find out more:

The Mooncup is a soft, silicone menstrual cup that you can reuse every time you get your period.

It was designed by women as a convenient, safe and eco-friendly alternative to tampons and pads.

Thanks to Mooncup users worldwide, over 2.8 billion tampons and pads have been diverted from landfill and our oceans.

The Mooncup is 5cm long and has a 'stem' to help with removal. As vaginal length varies, the stem of the Mooncup is designed to be trimmed if needed.
